Brown Precision, Inc.
Engineering Machining & Fabrication
90 Shields Rd.
Huntsville, Alabama 35811

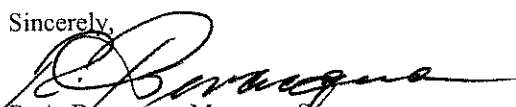

To the entire Brown Precision team,

Lockheed Martin Space & Strategic Missiles would like to take this opportunity to express a sincere appreciation to all Brown Precision employees for their outstanding efforts and support during the fabrication and manufacturing of the Mechanical Inspection Tool hardware. The close coordination, team effort, personal and professional relationship that has developed with Brown Precision during this program allowed Lockheed Martin to close all milestones and perform the test and evaluation on time. This difficult task could not have been accomplished without the dedicated efforts of everyone at Brown Precision.

Companies like Brown Precision, with their professionalism and expertise, allow Lockheed Martin to support the United States Navy with quality hardware and provide critical assets for the Trident II Submarine Launched Ballistic Missile program, which plays a major role in our National Defense.

A special Thank You to Mr. Shannon Pell for his willingness to always take that extra step to ensure that Lockheed Martin was able to meet all contractual obligation to the US Navy during this program.

Lockheed Martin believes that everyone at Brown Precision can take exceptional pride in a job well done. It was a great pleasure to be acquainted with your quality production staff and management. The sincere efforts of all of your employees are greatly appreciated.

Sincerely,

R. A. Bevacqua, Manager, Sr.
Lockheed Martin Engineering, Design and Evaluation
